ANNUAL REPORT 2021

The Trustee apportions its funding deficit between Participating Employers, based on the portions of the Fund's liabilities, which were originally accrued by members in service with each employer. When the Trustee determines that contributions are unlikely to be recovered from a Participating Employer, it can re-apportion the deficit contributions to other Participating Employers.

Entities participating in the MNOFF are exposed to the actuarial risk associated with the current and former employees of other entities through exposure to their share of the deficit those other entities default. As there is only a notional allocation of assets and liabilities to any employer, the Company is accounting for the MNOFF in its financial statements as if it was a defined contribution scheme. There are no contributions to the plan agreed at present.
